

DOE/Sandia Long Term Environmental Stewardship Plan Now Available

The Department of Energy's Kirtland Area Office and Sandia National Laboratories, in cooperation with various community representatives have written a draft plan to provide long-term environmental protection.

The plan will be available on August 22 at:

- the UNM Zimmerman Library, in the Government Documents section, or
- the Community Resource Information Office, 8338-B Comanche Rd NE. The CRIO office is open from 10 a.m. to 5 p.m. Tuesday - Thursday, or by appointment at 293-5514

The plan will also be available at a public meeting, scheduled for 6:30 p.m. August 29 at the Rotunda at Park North, 801 University SE, in the Science and Technology Park at UNM. (See separate

meeting flyer for more information.)

An essential element of the plan will be its flexibility. The Plan calls for regular reviews and changes to reflect public needs or interests. In keeping with this "living document" approach, the public is encouraged to provide comments on the first draft by September 22. Although the first version of the plan will be sent to the DOE Headquarters in Washington in October, DOE will continue to accept public comments.
